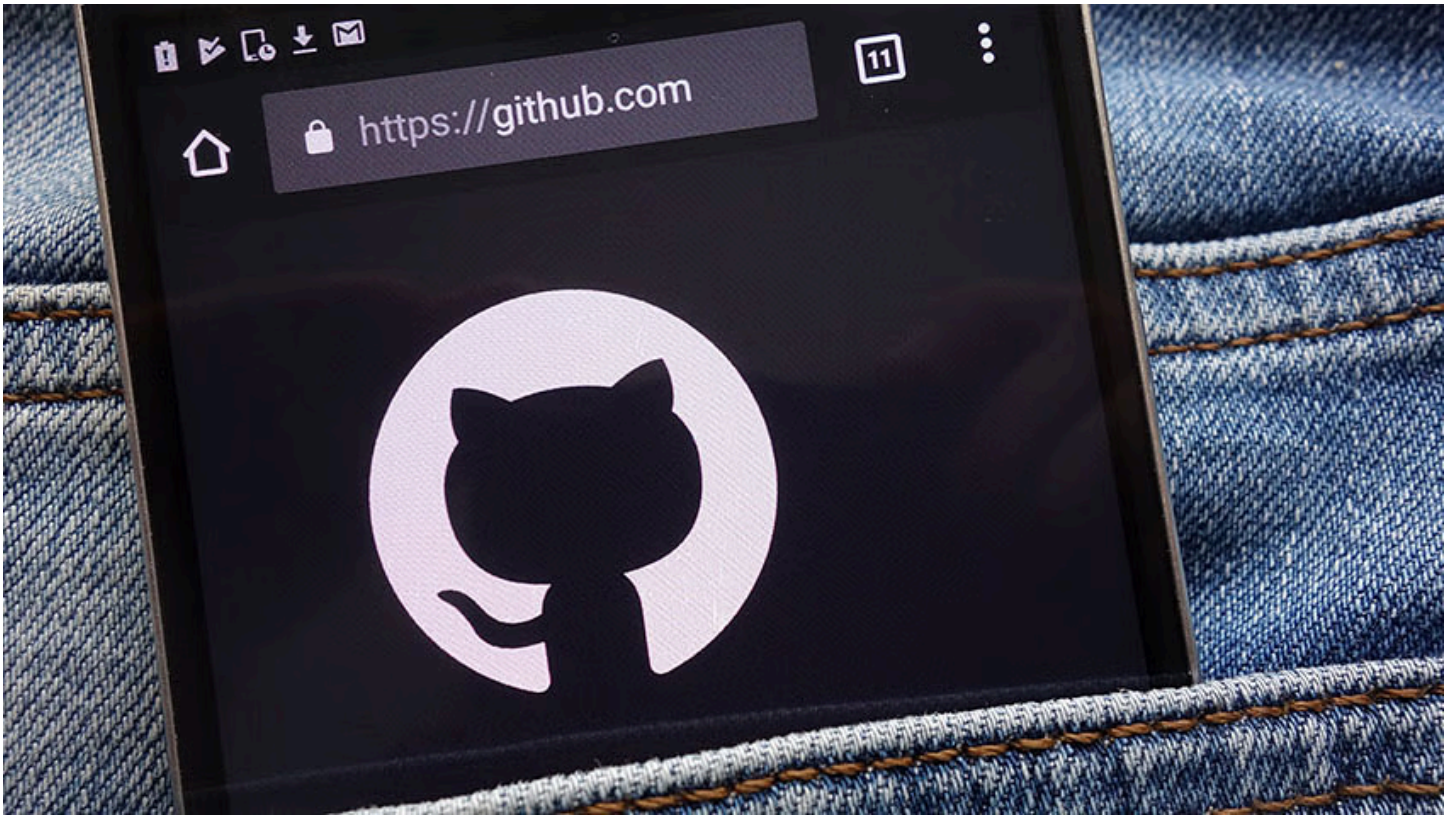
Information Technologies

GITHUB



We gonna see how Github works, how to create a repository in github or how to create an account in the application.

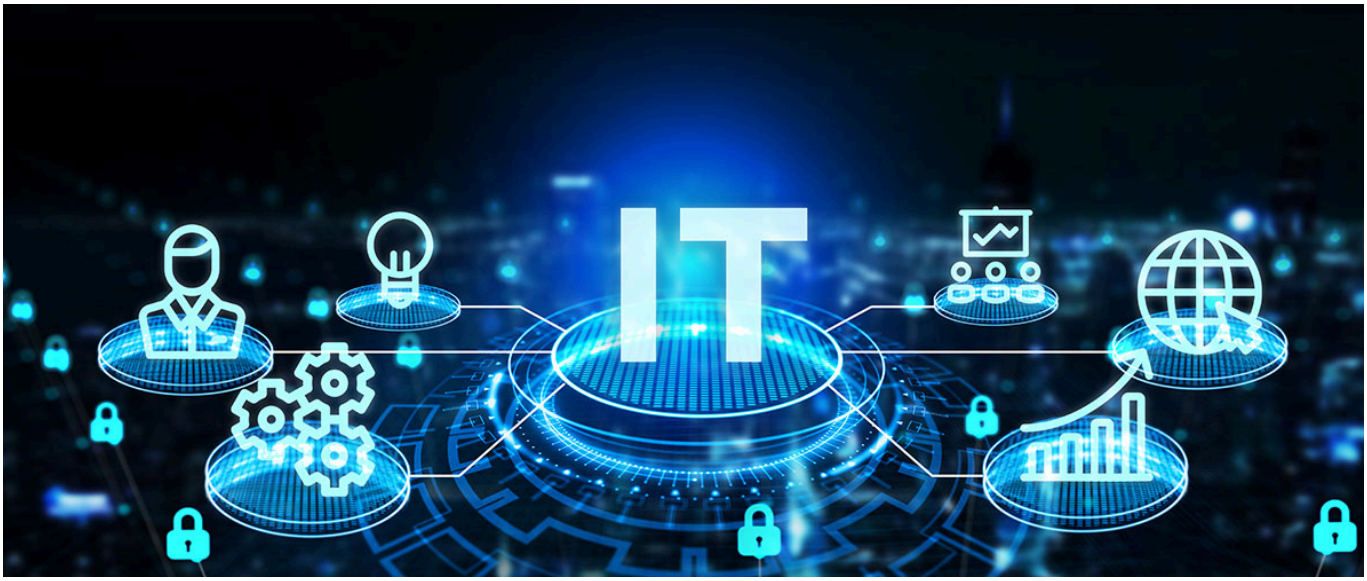
cycles:

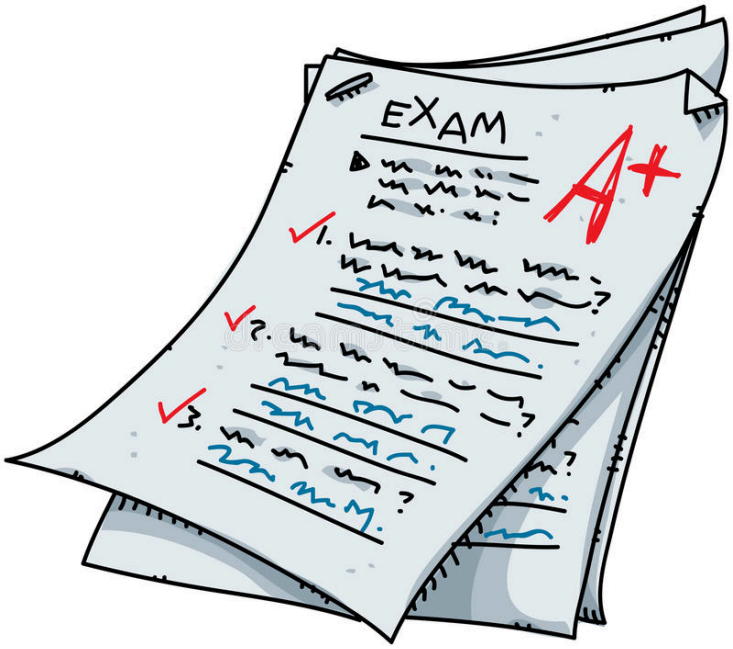
we will see nine cycles in the first two months. In them we will have different goals, for example:

Design an image explaining two numbers and show the sum, the difference and their product.

Cycle 1

(From March 04 to 08)





And in the last cycle we will see the graded test which will have a good weight in our grades.
